Final Conference

Boosting Research and Joint Cooperation: an Agrifood System Snapshot

19 May 2022 – h. 9:00-15:00

UNIVERSITY OF AGRONOMIC SCIENCES AND VETERINARY MEDICINE
OF BUCHAREST - FACULTY OF BIOTECHNOLOGIES
59 Mărăști Boulevard, District 1 - Bucharest, 011464

 Starting from the achievement of METROFOOD-PP project, with the goals and outcomes we set ourselves at supporting METROFOOD-RI to grow and move forward, the conference will represent the occasion to debate about the relevance of boosting research, cooperation, innovation, and stakeholder engagement in support to the agrifood.

The Conference will gather together representative of the scientific community and the relevant stakeholders of the agrifood system to discuss the main related challenges (with reference, e.g. to food quality & safety, traceability & transparency, digitalization, circular bioeconomy, sustainability and resilience) and share the point of view of both food businesses, covering primary production and food and drink industry, and consumers, even highlighting the importance of directly engaging all the different actors by applying multi-actor and co-creation approaches. Furthermore, the point of view of research and national metrology institutes will be considered, highlighting the importance of harmonization and standardization.
